Eighth Annual International Mathematical Modeling Challenge (IM²C)[®] 2022

We are pleased to announce the results of the eighth annual International Mathematical Modeling Challenge (IM²C). There were 31 countries/regions invited to participate in the 2022 IM²C and after the national selection round, 58 teams competed in the international round of judging. All teams worked at their own schools during a 5 day period between March 2nd and May 7th, 2022. Each team was given a modeling problem and then constructed their solutions. This year's problem **Aboard! Boarding and Disembarking a Plane** asked the teams to develop a model for the most time-effective plane boarding and disembarking methods.

Outstanding Teams

Advisor:
Mick Stukes
Students:
Yunjia Quan
Oscar Bao
Logan Yuhas
Anna Torstrick

We commend all the schools for their efforts. The judges were impressed with all the teams' creativity and ingenuity in mathematical modeling and in their ability to explain their strategies and problem-solving techniques in clear terms. Each participant is a true winner. A complete Results Report, listing all teams by designation, as well as the full problem statement can be found at www.immchallenge.org.
